

KINELEC AC-AC ISOLATOR

ACAC-1

Features :

- Input Voltage Range 220VAC
- Output available 230VAC 50 Hz
- Protections: Fuse
- Also available in U Racks
- 1 year warranty

Isolator Isolates the output from the input it provides you new phase neutral & earth it provides output voltage as input it does not control the output voltage

Dimension 260 x 285 x 185 mm (L- W - H)

Wt.16 kg (Approx)

AC-AC ISOLATOR

Applications:

1.Please note that each isolator is meant for one rack of telecom equipment only and this should not be used on main line which supplies power to whole office or the building.

2.The isolator is suitable for SU, server, routers, wireless, switch, hub, media converter, Printer, fax machine etc.

Installations Instructions:

The isolator has a main lead it has 3 wires (red phase) (black neutral) (green earth) these all the wires should be connected properly like red should be connected in phase, black with the neutral, green is not necessary to attach, if it is connected as instructed it gives better result which is to be attached to the UPS Output or electrical socket. At the back of the isolator there is a connector which has three output – neutral, phase and Earth – which are to be connected with the telecom equipment rack

In addition to the above voltage range, we can provide you with specific voltage as desired by you.
